Background

COREL™

Began in 1991

The start of Computer Art

Scientists and Programmers

The start of Computer Art

Outgrowth of the outer space, and military fields

The start of Computer Art

Artists discovering the computer in the 80's & early 90's
were guilty of playing with the tools

Computer Art today...

Artists from the late 1990's began exploring the art they can create with the digital tools.

Computer Art today...

Art created by a computer is only as good
as the artist who is creating it!

Brad Pitt

SAMSUNG
K4S161522E-JE60
K1478PE-KOREA

Computer Art today...

The computer is only a tool to create art!
Just like paint, pencils, chalk, or clay used with traditional media

Computer Art today...

You are the artist, not the computer!

2 types of digital art

Bitmap or Raster Art

Bitmapped Images

Composed of Pixels, similar to a real photograph

Bitmapped Images

Generated with a paint program or scanned-in from an original

Bitmapped Images

Resolution dependent

Bitmapped Images

Resolution determines the size of the file and the "sharpness" of the image

Bitmapped Images

Cannot be enlarged or resized without some loss in quality of the image

Vector Art

Vector Images

Created with mathematical formulas

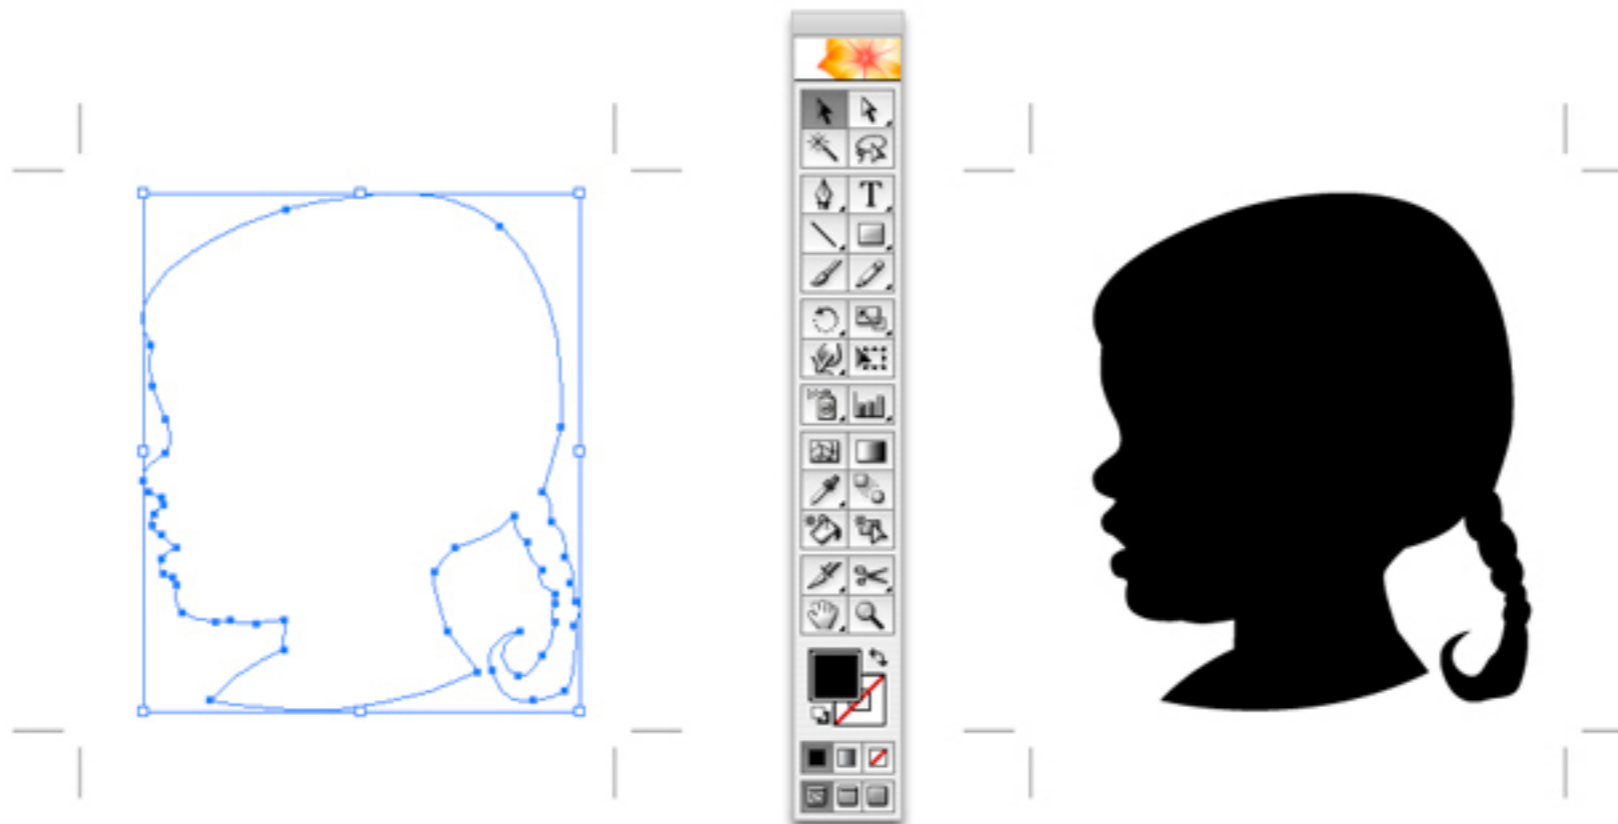

Vector Images

Made up of paths, with a start and end point, and contain straight lines, curves and angles.

Vector Images

A path can be a line, a square, or freeform shape.

Vector Images

Do not contain Pixels

Vector Images

CAN be enlarged or reduced without any loss in quality
